

The Moderate Party get things done. Not only in Sweden, but even at the EU level.

We want to create a freer and safer Europe for future generations.

We have got migration into Sweden under control through tough negotiations in the EU. We have pushed for tougher action on violence against women. We have ensured that there can be more nuclear power in Europe, making us less dependent on dirty coal and Russian gas. We have made sure that all Member States take responsibility for reducing emissions, instead of getting a free ride at the expense of Sweden.

And now we continue to fight for your freedom and security in Europe.

We will work for a European special police force to fight organised crime. We pledge to continue support for Ukraine for as long as it takes. Europe is worth defending.

We must reduce the regulatory burden for companies to create more jobs in Sweden. And we will push to make sure the right to abortion is protected, not only in Sweden but throughout Europe as a whole.

If you want to see things get done in the EU, then cast your vote for the Moderate Party.

For a free and safe Europe.

Limit criminals. Not the police.

The Moderate Party make punishment adequate for serious crime and then strengthen policing in Sweden. We want to do even more. We must stop the guns, drugs and organised crime flowing in to the EU. That is why we want to introduce a European special police force to fight gangs and stop the free movement of criminals. It is time to make Sweden safe again.

Lower emissions. More nuclear power.

The Moderate Party have pushed to create opportunities for new nuclear power in Europe. Nuclear power is now classified as sustainable. Sweden and Europe need more nuclear power if we want to reduce emissions and get rid of dirty coal and Russian gas. More nuclear power also means reduced energy costs in Sweden.

Secure Europe's borders. Make Sweden safe again.

Deciding who has the right to enter into the EU should not be up to human smugglers. Terrorists should not be granted entry, only to hide until they can attack. That is why we want to strengthen control over the EU's external borders. The Moderate Party have also worked hard to get EU migration policy in order. We will continue to do that.

Protect abortion rights. Everything else is wrong.

For the Moderate Party, protecting the right to abortion is central. A woman's self-determination is a fundamental human right. That is why we believe that the right to abortion belongs enshrined in the EU Charter of Fundamental Rights. This does not mean that we will bargain on our Swedish abortion laws with other Member States. We will fight to protect the right to abortion throughout the EU.

Less red tape and bureaucracy. More jobs in Sweden.

European cooperation is crucial to the prosperity of Sweden. Trade within the EU and free trade with the rest of the world are what drive job creation and economic growth. Unfortunately, complicated rules and EU bureaucracy constitute obstacles. The Moderate Party want to change that. With more jobs and more businesses, we are building a stronger Sweden.

Swedish forests. Swedish rules.

Swedish forests create jobs and generate tax revenue. They are an important part of our history and identity. Forestry is also an important factor in climate policy. That is why we always stand up for Swedish forests when EU impinge on our forestry. This means that regulations concerning our forest should be decided first and foremost in Sweden, not in Brussels.
