Good bye thieves

Here in Sweden, foreign criminal gangs are behind half of all burglaries. This is to be stopped.

For this reason, European police collaboration will be strengthened to combat criminal gangs and the smuggling of drugs and weapons. Freedom of movement will not apply to criminals. And EU citizens who commit crimes in Sweden will be expelled.

Watching Europe's borders

Europe needs better controlled, more predictable immigration.

That's why its external borders must be strengthened. And the right to asylum will be examined immediately at the EU border – swiftly and within the rule of law. Sweden cannot continue taking too great a responsibility for immigration to Europe. This responsibility must be shared fairly.

Nuclear energy is climate wise

If we expand our nuclear energy capacity, we can save the climate.

This is demonstrated by figures from the UN panel for climate change. That's why we want to double EU investment in nuclear energy. Because Europe needs more climate-wise electricity from renewable sources and nuclear energy - not dirty coal power and Russian gas.

Freedom Enterprise Confidence

Growth and confidence in Europe must improve.

That's why we need more business and free trade – and fewer taxes and subsidies. Europe's internal market must be opened up even more. Sweden's EU contributions are not to be raised and we say no to EU taxes.
